- Q1] Create a button that toggles a CSS class on a specific element when clicked. For example, clicking the button should change the background colour of a div or toggle between hiding and showing an element.

```
<!DOCTYPE html>
```

```
<html lang = "en">
```

```
<head>
```

```
<meta charset = "UTF-8">
```

```
<meta name = "viewport" content = "width=device-width, initial-scale = 1.0">
```

```
<title>Toggle CSS class</title>
```

```
<style>
```

```
  box {
```

```
    width : 200px;
```

```
    height : 200px;
```

```
    background-color : #ccc;
```

```
    margin : 20px;
```

```
    transition : background-color 0.3s ease;
```

```
  {
```

```
    highlight {
```

```
      background-color : yellow;
```

```
  {
```

```
    highlight {
```

```
      background-color : yellow;
```

```
  }
```

```
</style>
```

```
</head>
```

```
<body>
```

```
<div class = "box" id = "target Element"></div>
```

```
<button onclick = "toggleClass()">Toggle class</button>
```

```

<script>
function toggle class ( ) {
const target Element = document.getElementById (target Ele-
ment); target Element. class List. toggle (highlight);
}
</script>
</body>
</html>

```

```

<div class="highlight">
</div>

```
